

## **Summary of the meeting:**

The meeting discussed the implementation of GUI using the Python library kinter. The presenter explained creating a table, highlighting cells, inputting values, and creating a DFA diagram. They also mentioned a custom dialog class for beautifying the code.

## **Meeting Agenda:**

### **1. Agenda**

- Discuss the implementation of GUI using kinter
- Explain the process of creating a table
- Highlight the functionality of highlighting cells
- Present the input values function

### **2. Discussion Topics**

- Creating a DFA diagram
- Utilizing the custom dialog class

### **3. Weekly Updates**

- Progress on GUI implementation
- Updates on table creation

### **4. Priority Tasks**

- Finalize design for highlighting cells
- Enhance the appearance of the custom dialog class

### **5. Notes**

- Use kinter built-in commands for GUI elements
- Ensure consistent color scheme for highlighted cells.
